

CONNECT DATA SOURCES

CropX Telemetry

The CropX telemetry device has been redesigned for 2023!

Data collected from connected devices is fed into the CropX system, allowing users to access data visualizations and agronomic advice from their desktop or mobile devices.

The redesigned CropX Telemetry offers:

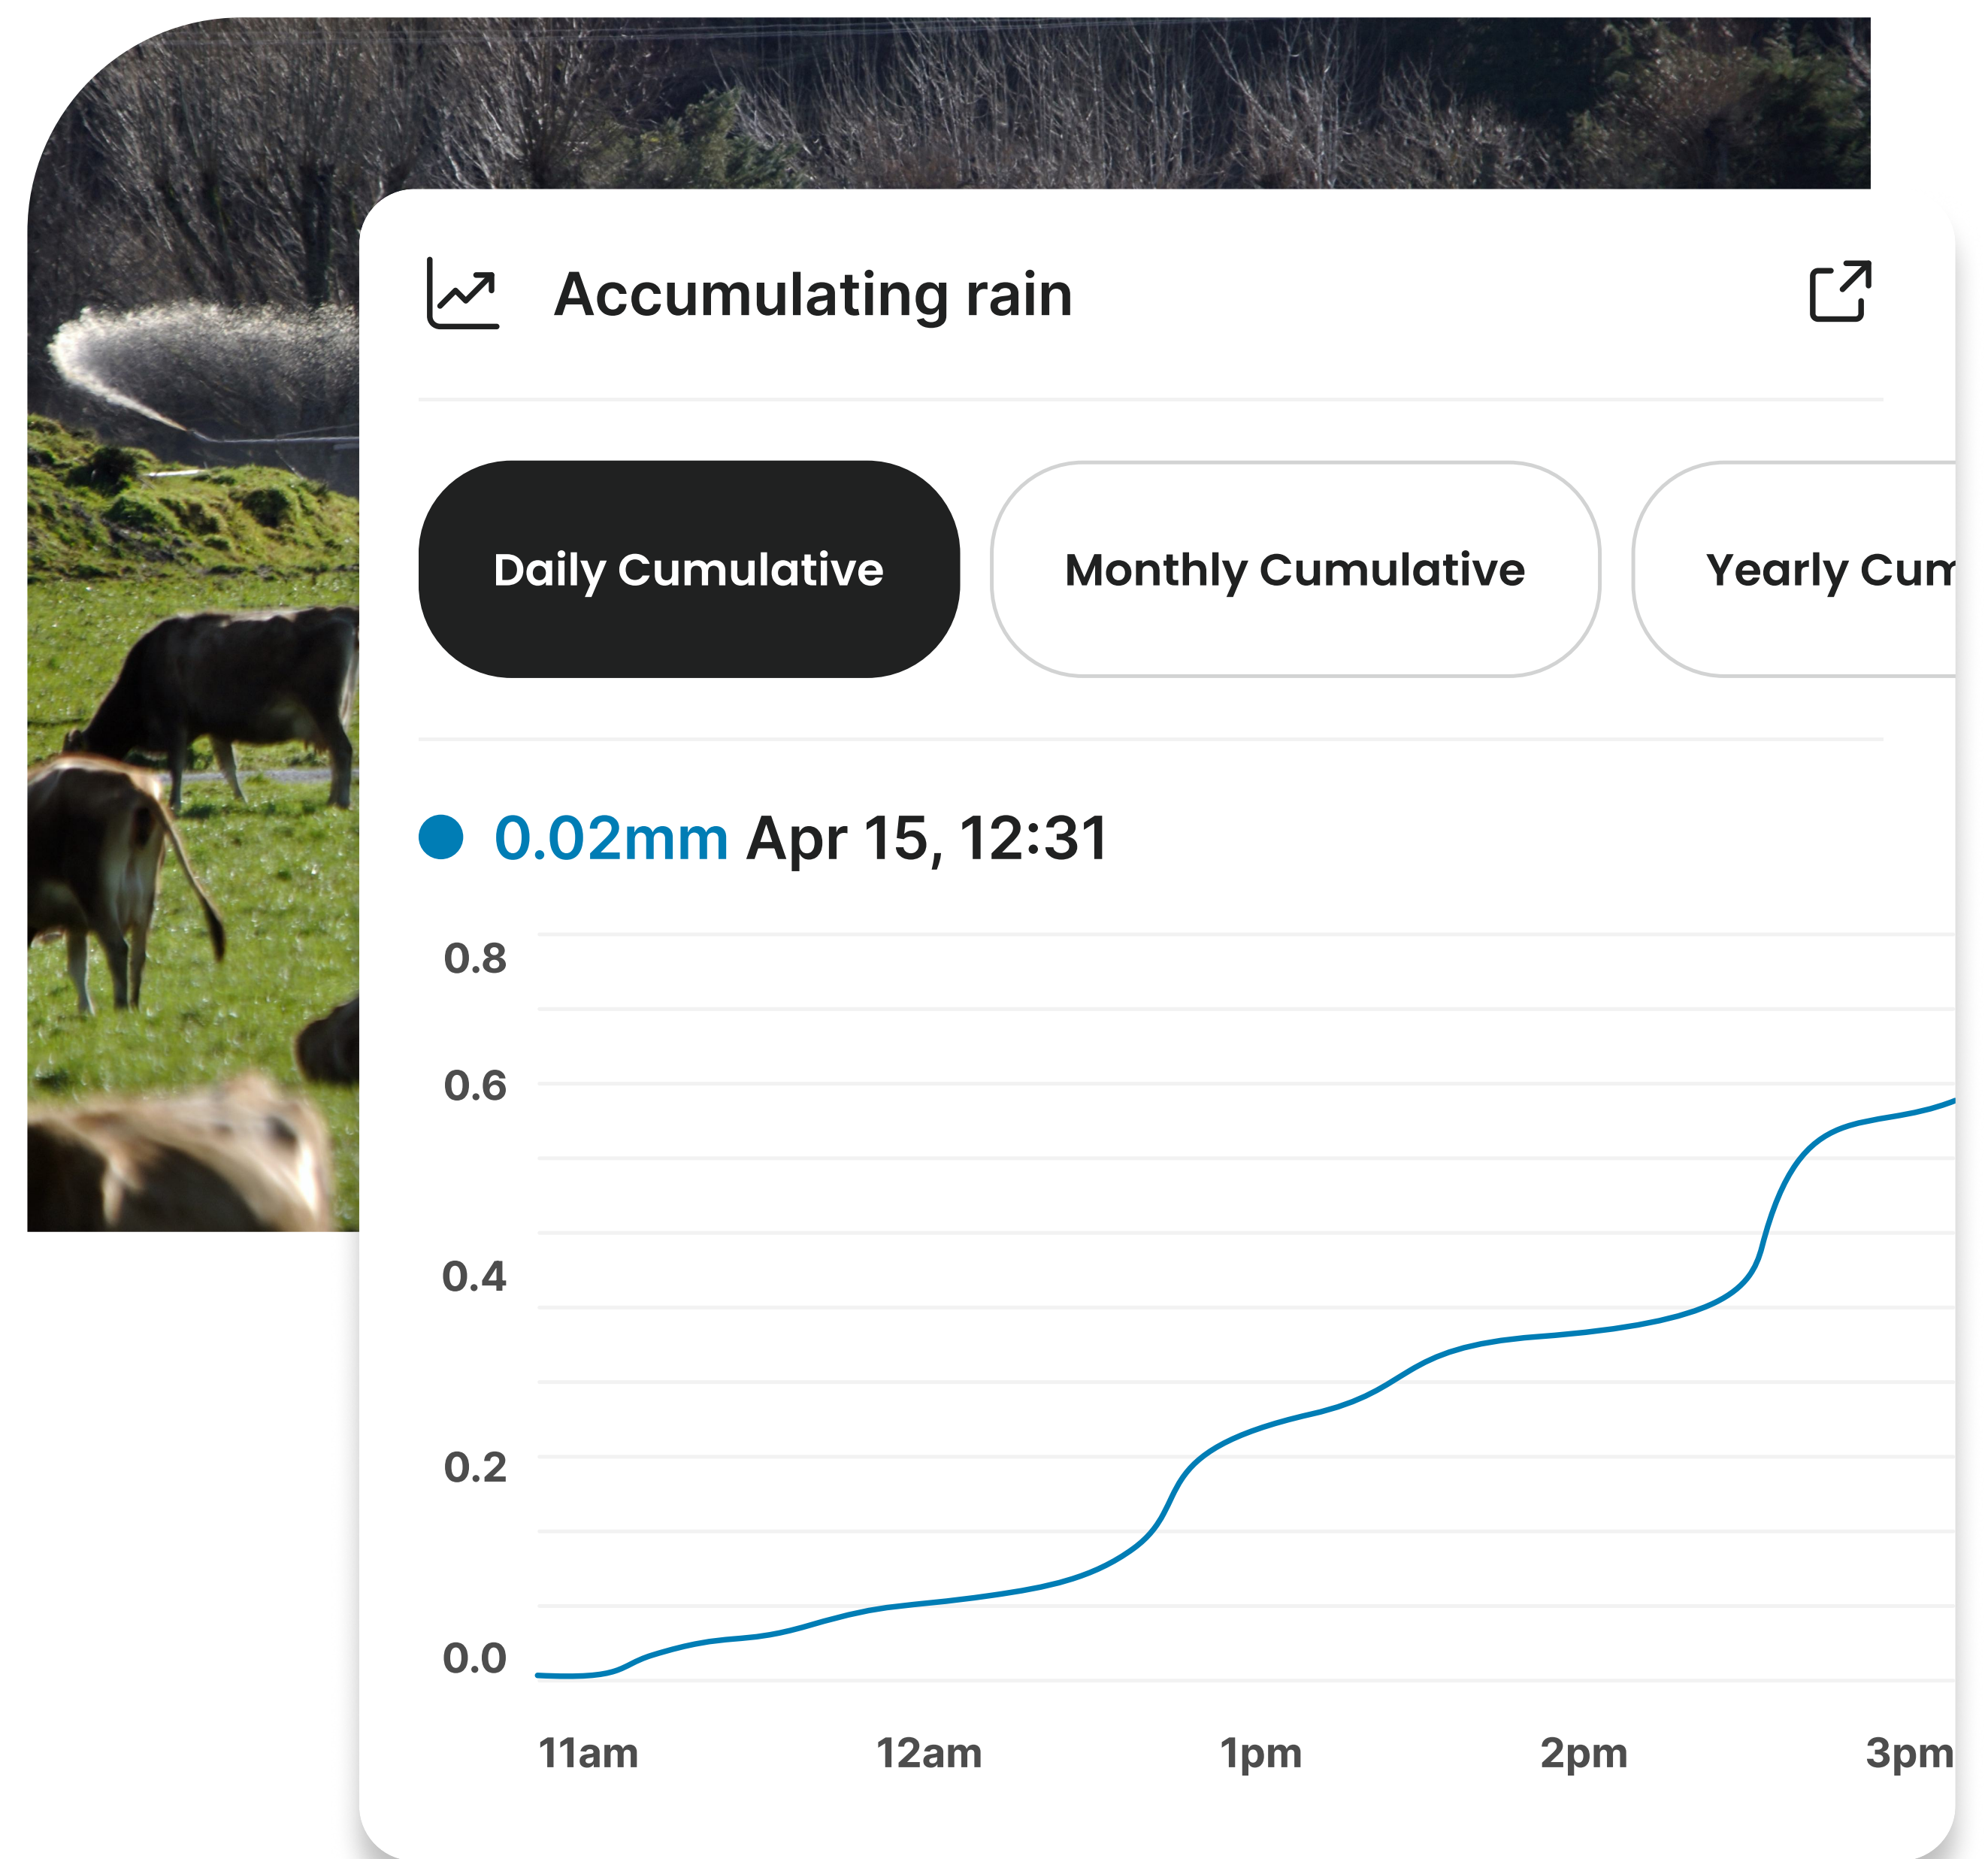

- Plug and play connectivity to CropX solution
- Installation ease
- Dependability

This product is for customers with non-CropX soil sensors and other data capture hardware such as weather stations and rain gauges that want to access the powerful CropX solution.

Simplify Data Management

Users can leverage their existing data into the CropX system to manage all their agronomic data on one platform and activate powerful agronomic insights and advice. This makes it easier for users to track and report on their agronomic activities and results.

Features

- Season-long battery life
- Sleek design with tool-free installation
- Easy device activation
- Ability to connect a broad range of sensors
- Optional solar panel
- Includes: 2 meter cable with open end wires

Connections

Each CropX telemetry devices has 2 SDI-12+ 2 Pulse counter+ current loop (communication protocol) to connect the following devices:

- Soil sensors – Sentek, Terrasen, Aquacheck
- ET Sensor
- Rain gauge – CropX, Davis
- Effluent pond level meter
- Pressure switch
